

DATA SHEET

RUNPOTEC - RT 2008

SPECIFICATION

(RRP/excl. of VAT)

LENGTH	51 cm				
WEIGHT/KG	1,12 kg				
ITEM NO.	10001				
MATERIAL	special plastic				
APPLICATION	optimal for tube Ø 16 mm – 32 mm				
DISTANCES	0,5 m - 30 m				
TENSION LOAD	170 kg (RUNPOGLIDER spiral MET)				
FISH TAPE	exclusively with RUNPOGLIDER spiral MET				

DESCRIPTION

RT 2008 cable pulling device is an amazing problem solver with different accessories for pipe diameter 16, 20, 25, 32, 40 to facilitate your work. With this patented special tool the cable installation is much easier and faster than the normal procedure, further it protects your hands and fingers while working. Due to the two red locking rings the power transmission from your hands to the metalspiral is incredible. For long distances or any resistance in the pipe which cannot be overcome by normal pumping it is necessary to activate the ratchet function. The integrated double ratchet system enables to push and rotate the metalspiral in the same working process. For quicker rotation it is possible to work in combination with a cordless screw driver, which is recommended for lengths of 20 metres upwards. RT 2008 only works in combination with RUNPOGLIDER spiral MET (metal) with RUNPOGLIDER! Please watch the videos to see all possible applications and how to use the RT 2008.
